1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

It might be extremely challenging because pupils are unaware of the admission standards in various universities. They waste lot of time and money.

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Harish

- create admin module
- list of colleges or universities
- admin can add/delete college
- student can view college details
- contains various streams of college details

Akila

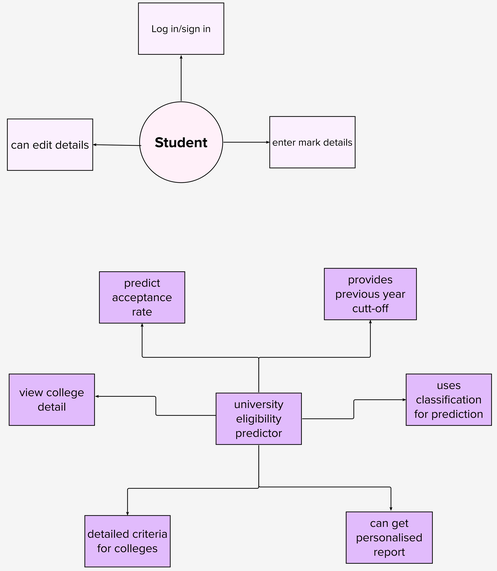
- provides previous year cutt-off
- create student module
- students can view their Profile
- computerization of the entrance seat allotment process
- can get personalised report
- recommends according to predicted chances

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes



4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
